Video Productions

Unposed and discrete, Video gets the true mood of your big day

Video gets many moments missed by photography, some beautiful and some very funny

and not always to plan

You will probably SEE about 65% only of the things that happen on the day, and without a Video, after about 2 weeks have passed, you will remember only about a third (33%)

Video will capture 70%-80% of the days main action, including ALL of the critical moments, and including LOTS that YOU didn't even see on the day.

You get to recall it ALL - forever
